

Corporate-grade financial structure, without the cost of a full-time CFO.

Boutique advisory for growing mid-market companies that need real financial discipline.

Debt structuring and treasury for growing mid-market companies.

• Debt structuring

Refinancing, credit lines, and capital for expansion. For financing growth, fixing high interest costs that are draining liquidity, or cleaning up the capital structure before a sale.

• Treasury management

Cash flow forecasting, banking relationships, and liquidity discipline, built for how growing mid-market companies actually operate.

• Fractional CFO

Executive reporting, forecasting, and decision support for the CEO, without a full-time hire.

• Cross-border expansion

Entity structuring, cross-border banking, and financial governance between the U.S. and Latin America, in either direction.

• AI-driven finance automation

Applying AI tools to finance and operations to cut manual work and improve reporting quality.

• Growth strategy

How to structure capital and operations so a company's growth is actually sustainable.
